

ATLAS Hovercraft Inc.

Commercial Hovercraft for America

ATLAS Hovercraft, Inc.
2006

Agenda

- Introduction
- ATLAS Corporate Overview
- ATLAS Hovercraft & Technology
- ATLAS Transportation Solutions
- ATLAS Pictures & CAD Drawings
- Questions

Introduction

Kurt H. Peterson - CEO

- Hovercraft designer and builder
- Port Engineer and Shipyard Manager
- Teacher of advanced diesel engines and marine technology

ATLAS Team Members

- Jay M. McCleary - COO
- William Hayden – Vice President of Engineering
- Stanley Stumbo – Senior Naval Architect & Marine Engineer

ATLAS Corporate Overview

- Florida Corporation – 2004
- Secured First Contract - 2004
- Green Cove Springs - 2005
- Largest Hovercraft Factory
- 100% American Owned
- 100% Self Funded
- Management
- Staff
- Future

ATLAS Hovercraft & Technology

- AH-100 = Only 100% American Designed USCG T-Boat / Jones Act Compliant Hovercraft
- AH-100 = 150 passengers
- AH-100 = Largest Hovercraft in the Western Hemisphere
- AH-100 = Largest Composite Hovercraft Ever Constructed
- AH-100 = Largest Diesel / Electric Powered Hovercraft
- AH-100 = Thrust Vectored Propulsion System

What is an ATLAS Hovercraft?

- "Triphibian" Land – Water - Air
- Skirt System
- Uses Low Pressure Air for Propulsion
- Low Wake Wash
- Ecologically Friendly
- Higher Speed, Safety, and Comfort
- Low Noise Due to Advanced Technology

ATLAS Transportation Solutions

Significant Advantages

- Low purchase cost per passenger seat (AH-100 = \$40,000 per seat)
- Low cost per hour to operate and maintain
- Rivers, lakes, and oceans are "natural highways"
- Require no "dredging" or expensive infrastructure
- Work seamlessly with other forms of existing transportation (bus, trains, taxi, etc.)
- Environmentally Friendly – Low Noise and Low Wake Wash
- Heavy Payload Capacity
- Flexible Designs – Passengers / Vehicles / Cargo
- Safe and Fuel Efficient High Speed Operation
