

NSRP Technical Panel SP-3

“Preserving the value of ships for 33 years”

White Paper Project Ideas

July 20, 2006

Jacksonville Beach, FL

White Paper Requirements

- Use the Panel Project Guide to develop your submissions. Note changes from last year.
- Write the white paper at a technical level that can be understood by ECB members who have various backgrounds.
- Identify the primer and sub-contractors with the funding each needs.
- Identify the shipyards or organizations who have agreed to participate.
- Identify the expected implementation plan if the project is successful.
- Identify the shipyards who have expressed interest in seeing and/or implementing the results.
- If the project requires a survey, show that the survey audience is interested in completing the survey.
- SP-3 Panel deadline to submit white papers is August 16, 2007. Steering Committee needs time to review and vote on submittals, so send proposals to Panel Chair by August 6.

2007 White Paper Ideas

- **Training for inspectors who look at water jetted surfaces**
- **Conductivity levels ?**
- **Blast profiles?**
- **Instrument a ship with data loggers**
- **Phase II on QA rules project**
- **Profile readings – stylus versus Testex tape, why average numbers obtained digitally? Correlate and normalize the readings. DFT gage use?**
- **Survey of safety issues for blasters and painters**
- **Different blast media that improve health and safety**
- **Review waivers to determine the cost drivers**
- **IMO ballast tanks rules invoked by ABS**
- **Virtual training for sprayers**
