

## Crosscut Initiatives Panel Meeting Biloxi, Mississippi January 31, 2007

### MEETING OVERVIEW

Join the winter Crosscut Initiatives Panel meeting at Ship Tech 2007 in Biloxi January 30-31. The work of our panel is to find ways to improve vessel construction and repair affordability through people and technology. Our tools are organization and culture change, education and training innovations, workforce development, technology transfer, and HR management. If we understand emerging technologies such as ship design, materials, production and business processes, and systems better then we can suggest or develop ways to get better results in preparing and upgrading managers, supervisors, and technicians. Plan to attend the technical sessions of your choice, listen, ask questions, and then gather for the afternoon of January 31 to plan further research and action. Panel project updates will be presented. Registration for ShipTech is restricted to US Citizens with Military Critical Technical Data Agreement (DD Form 2345).

More conference details are at: [ShipTech 2007](#)
