General Information

- GoToMeeting® requires specific software to join a meeting. If you have never used GoToMeeting®, click the “Join the Meeting” link at least 15-20 minutes in advance of the meeting and download the software (it will automatically launch after you click the link but you may have to click on “run” to complete the process). Even if you already have the necessary software, we recommend you join the meeting well in advance of the start time.
- Please put your phone on mute throughout the call to eliminate background noise.
- If you have a question during the course of the call, use the “question” function on the GoTo Meeting® window to submit a question to the call organizer (only the organizer will be able to view your question). We will again try to answer these--and any we received in advance--during the course of the call, but if not will do so in writing after the call.
