

New Products – NCP Coatings

Carol Rosler

NSRP – February 2010

NCP

QPL Approvals

- MIL-DTL-24607B
New 250 gram/liter version
- MIL-PRF-24596B
New 250 gram/liter version

Products in QPL Testing

- NCP's High Durability Polysiloxane coating.

This product allows for easier touch up and repair and is less dependent on humidity for curing compared to other polysiloxane technologies available.

NCP

New QPL Submittal

- Single Coat Rapid Cure System with OAP

Product designed for use in ballast tanks, fuel tanks and chemical holding tanks.

Can spray up to 45 mils in one coat with no sagging.

NCP

Current R&D Efforts

- Development of MIL-PRF-24763B product at <100 grams/liter VOC.
 - Current product meets all specification criteria
 - Evaluating the Anti Stain potential of this system
 - QPL submittal by the end of May

Current R&D Efforts

- Development of Type VI MIL-DTL-24441
 - Solvent Free
 - Certifiable to NSF ANSI Std. 61
