

Democratising DED in the Supply Chain

Robert Bowerman, Technical
Consultant, Autodesk

SPEAKER BIO

Robert Bowerman

A Technical Consultant at Autodesk, based in the Fusion360 product team, working in the field of Additive Manufacturing. Robert's work includes collaborative work with industrial partners and internal R&D to create the future workflows for Additive Manufacturing processes, with a focus on Directed Energy Deposition and Powder Bed Fusion. Robert's motivation is to drive innovation within AM to achieve scale and adoption throughout the supply chain, such that its potential can be realised in real world applications.

CONTENTS

An Intro to DED

Technology variants

Metal AM comparisons

DED Today

Who – industries involved

Why – business case

What – products being made

How – specific machines

Barriers

Driving Adoption

4 pillars of adoption

What are Autodesk doing?

Introduction To DED

7 Families of Additive Manufacturing

According to ASTM F2792 Standards

			
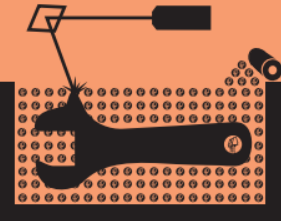

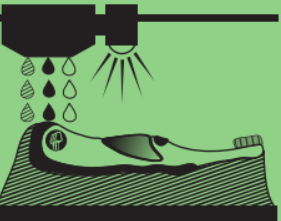

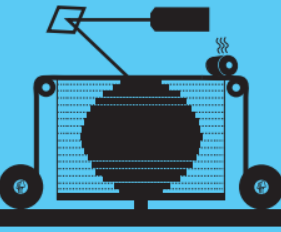

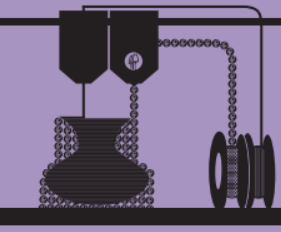

<p>VAT PHOTOPOLYMERIZATION</p>	<p>POWDER BED FUSION (PBF)</p>	<p>BINDER JETTING</p>	<p>MATERIAL JETTING</p>
<p>Alternative Names: SLA™ - Stereolithography Apparatus DLP™ - Digital Light Processing 3SP™ - Scan, Spin, and Selectively Photocure CLIP™ - Continuous Liquid Interface Production</p>	<p>Alternative Names: SLS™ - Selective Laser Sintering; DMLS™ - Direct Metal Laser Sintering; SLM™ - Selective Laser Melting; EBM™ - Electron Beam Melting; SHS™ - Selective Heat Sintering; MJF™ - Multi-Jet Fusion</p>	<p>Alternative Names: 3DP™ - 3D Printing ExOne Voxeljet</p>	<p>Alternative Names: Polyjet™ SCP™ - Smooth Curvatures Printing MJM - Multi-Jet Modeling Projet™</p>
			
<p>SHEET LAMINATION</p>	<p>MATERIAL EXTRUSION</p>	<p>DIRECTED ENERGY DEPOSITION (DED)</p>	
<p>Alternative Names: LOM - Laminated Object Manufacture SDL - Selective Deposition Lamination UAM - Ultrasonic Additive Manufacturing</p>	<p>Alternative Names: FFF - Fused Filament Fabrication FDM™ - Fused Deposition Modeling</p>	<p>Alternative Names: LMD - Laser Metal Deposition LENS™ - Laser Engineered Net Shaping DMD™ - Direct Metal Deposition</p>

Barriers

Incomplete and fragmented software workflows

Process requires expert knowledge

Limited materials know-how

Qualification of parts

Expensive hardware

Lack of turnkey solutions

Few real life examples

Lack of standards

Failure to scale

\$\$\$

Driving Adoption

How might industry gain access to DED...?

To achieve scale we must drive its adoption down the supply chain

To enable adoption we must overcome the current barriers

Hardware

Work with and enable low-cost machines

Software

Accessible integrated workflows

People

Tools that reduce specialist knowledge

Processes

Ability to achieve a first-time right build

Hardware

Work with and enable low-cost machines

-
- Accessible
 - Repeatable
 - Reliable
 - Standards

Meltio

ABB

Low cost hybrid

DMG Mori

Digital Alloys

Aconity3D

BeAM

Mazak

Software

Accessible integrated workflows

-
- Accessible
 - Ease of use
 - Integrated
 - Connected

Part design

Design for manufacture

Toolpath Planning

Process Simulation

Machine Simulation

NC Creation

Machine Connection

Manufacture

Where do I start?

Embedding knowledge into software
and having access to parameters

Most Popular Autodesk Apps

How did it go?

Store and learn from experience

Will it work?

Predictive software

What is best practice?

Develop standards

Barriers

How could this group help?

Incomplete and fragmented software workflows

Process requires expert knowledge

Limited materials know-how

Qualification of parts

Expensive hardware

Lack of turnkey solutions

Few real life examples

Lack of standards

How is Your Work Contributing?

Incomplete and fragmented software workflows

Process requires expert knowledge

Limited materials know-how

Qualification of parts

Expensive hardware

Lack of turnkey solutions

Summary

Realise the benefits of DED by driving adoption down the supply chain

Four key pillars identified to scale the technology

Collaboration is key and no one can scale this technology on their own

Please reach out!

Sustainability

Shorter production lead times

Reduced material waste and spare parts

Improved part performance

De-centralised manufacturing
