

RAP: “AMUET 4.0” – Demonstration

Thursday 20 October 2022

AIDT (Maritime Training Center)

360 Addsko Road, Mobile, AL 36602

Team: ShipConstructor Software USA (Lead) | Austal USA |
Norfolk Naval Shipyard | Pear Harbor Naval Shipyard |
Solavitek

AMUET

Advanced Mobile Universal Electrical Tooling

The Project Team will provide a Demonstration of the AMUET 4.0 platform which include hands-on opportunities for those attending.
This is an in-person only event.

This RAP improves the paperless effort for electrical production and test using existing digital data over the original AMUET platform.

The AMUET tool platform is an intuitive solution providing an efficient and comprehensive system for electrical cable installation, connectorization, production control, and onboard maintenance / trouble shooting for shipbuilding and repair.
