

Epsilon Systems: Where Our Innovations Become Your Solutions

*Presented to NSRP – Workforce & Compliance Panel Meeting
May 19, 2025*

A 100% Employee-Owned Company

Epsilon Systems – A Trusted Partner

- Diverse Professional and Technical Services Company
 - Founded in 1998
 - Consistent Organic Growth
 - Targeted Technology Acquisitions
- Nearly 1,200 Skilled Professionals
 - Scientists/Engineers
 - Technical Specialists
 - Skilled Craftsmen

Infrastructure and Technical Solutions

Training Development Capabilities: Solutions Across the Entire Learning and Development Spectrum – a results-driven team of professionals creating complete training solutions using the latest technologies including simulation and virtual reality.

Software Solutions – We employ the latest tools and techniques to effectively manage the entire software development life cycle.

A 100% Employee-Owned Company

www.epsilonssystems.com

Environment, Health, & Safety (EHS) Compliance Software

- EHSdesk Application

- Over 20 years as a software solution initially in Windows and now deployed as web-based
- Leveraged by 10,000+ users in 400+ locations worldwide in English, French, Polish, Hebrew, and Chinese
- Accessible via mobile devices
- EHSdesk is a commercial SaaS product

- EHSdesk Clients

- Lockheed Martin (Sikorsky/RMS)
- Raytheon Technologies (Pratt & Whitney, Collins Aerospace)
- Sanofi Pasteur
- National Steel and Shipbuilding Company (NASSCO)

Environment, Health, & Safety (EHS) Compliance Dilemma

- **PROBLEM:** Timeliness of Repairs to maintain a Ready Fleet and get the Ships out to Sea faster troubles the industry along with difficulties in maintaining a properly trained workforce. EH&S Departments are hard pressed to respond to the emerging complexities of the operations of the yard and workforce issues all while meeting the difficult demands of staying compliant with diverse EPA/OSHA, State, and Local requirements.

You Can't Measure What You Don't Manage!

- **NEED:** Innovation and Efficiencies are needed to manage multifaceted EH&S data to grow from:
 - Disparate point solutions (Excel, MSAccess, Sharepoint, Other Software) with potentially no one left that understands it OR
 - Web solutions that are too generic – too expensive – not responsive enough to change - and don't 'fit'

National Shipbuilding Research Program (NSRP) Proposal

- **IDEA:** Adjust EHSdesk compliance software where needed to better serve the Shipbuilding Industry both with enhancements and improved standardized content. Partner with NSRP and Member companies to craft **Maritime EHSdesk**.

- **PREMISE:** The EHSdesk design and mature production use at large facilities for 20+ years is aimed at the Aerospace Manufacturing industry. As a modern SaaS portal, it is **affordable, integrated “one-stop shopping”, and easily implemented** to meet the mission of NSRP to *“research, develop, mature, and implement industry-relevant shipbuilding and sustainment technologies and processes, improving efficiency across the U.S. shipyard industrial base and meeting future demand”*.
 - Aerospace and Shipbuilding requirements in the EH&S realm align thus making EHSdesk as it stands a good fit. Focused customization will enhance it further ([see Paintman/Fuelburn example next slides](#))
 - EHSdesk is pre-filled with best in class drop down/checklist content based on decades of use across a broad spectrum. **Shipyard subject matter experts** could be enlisted to adjust the configurable contents suitable for Maritime needs. ([see Paintman example next slides](#))

EHSdesk Shipbuilding Pilot – Lessons Learned – Examples

- **PILOT:** The Painting/Coating/Spraying Emissions Mgt. (Paintman) and Waste Tracking applications were implemented at a large Shipyard in San Diego. Lessons were learned with upgrades applied that can **benefit other Shipyards**.
- Ⓐ Other clients had high volume of Usage but a concise list of paints/coatings. The Shipyard had high volume of activity with a limited list on a routine basis however they also had a LONG list of occasionally needed additional paints/coatings such that the pick list for Painters/Operators became unmanageable.
- Ⓑ Some companies deal in hours/minutes computing against hourly limits where thinner factors in and Start/Stop Quantity of Paint is needed which requires a more difficult level of precision by operators entering data

Add Painting/Coating Usage - Multiple Quantity

Complete the fields below to add new Painting/Coating Usage events.

Painting/Coating Usage Details

*Usage Person: Cottle, Betsy *Activity: Paint Base Coating

*Location: Training Site Building/Area:

*Date: 4/19/2024

*Equipment Id: T-PTO-972497-01 Test Primeline 1

*Unit Of Measure: Gallons

*Painting/Coating Material: BT-8009-94: GT 4637, Clear; Brenntag Pacific

*Application Method 1: Spray Gun *Painting/Coating Qty 1:

Application Method 2: Painting/Coating Qty 2:

CANCEL ADD

CREATIVE SOLUTIONS:

- Ⓐ Setup pages are upgraded to  the most used “favorite” Paints/Coatings. Add page defaults to show “favorites” but can easily show the full list with a click of a button. The list is also sortable by Name or ID as some Operators are more familiar with one or the other.
- Ⓑ Simplified version of the Add page was created to eliminate Time/Thinner/Start/Stop Qty while also speeding up input recording 2 application methods at once. ADMIN pages available to mass recompute waste QTY based on %.

EHSdesk Shipbuilding Pilot – Lessons Learned – Examples

- C** Drop down list content provided for some lists was not perfect for Maritime needs.
- D** Due to the nature of some work by contractors, software access is not always provided (for business reasons and/or potentially poor Internet access). Paint Logs are managed in Excel and then sent to EHS for input into the database.

Edit Material Details

Complete the fields below to update the details of the Material.

Material Details

* Material ID:

* Material Name:

Also Known As No.:

* Safety Data Sheet:

* SDS ID:

Trade Name:

Material Specification:

Spec Material Files On Pro:

* Material Files On Pro:

Marine Coating Category:

Material Type:

Refrigerant Class:

* Kit Type? ☐ Kit ☒ Component ☐ Not Applicable

* Painting/Coating? ☒ Yes ☐ No

* Fuel Burning? ☐ Yes ☒ No

Unit Of Measure:

Comments:

Status: ☒ Active ☐ Inactive

Data Source: File Import

Attached File:

[Attach File](#)

[CANCEL](#) [SAVE](#)

CREATIVE SOLUTIONS:

- C** The Painting/Coating Category value for a Paint Material was rebranded Marine Coating Category and loaded with more applicable content.
- D** An Excel Import template was created with a mass upload Import link for EHS to allow them to quickly upload the contractor data saving LOTS of typing time.

Administrator Usage/Emission Options

- [View or Edit Painting/Coating Usage](#)
- [View or Edit Painting/Coating Exceedance](#)
- [Import Painting/Coating Usage](#)

EHSdesk Shipbuilding Pilot – Lessons Learned – Examples

- E Fuel based Emissions can be tied to set Pollutants like NOx or can be tracked by chemical constituent (aka CAS Number).

Edit Fuel Burning Usage with Emissions

Complete the fields below to update a Fuel Burning Equipment Usage record. Emissions will recalculate upon save.

Fuel Burning Usage Details: 8706 VOID

Equipment Id/Name: PTO-921303 Crane 14

Usage Person: Magi

Location: NAS

*Activity: Routine Operations

*Usage Date: 01/31/2024

*Fuel: Diesel Fuel #2

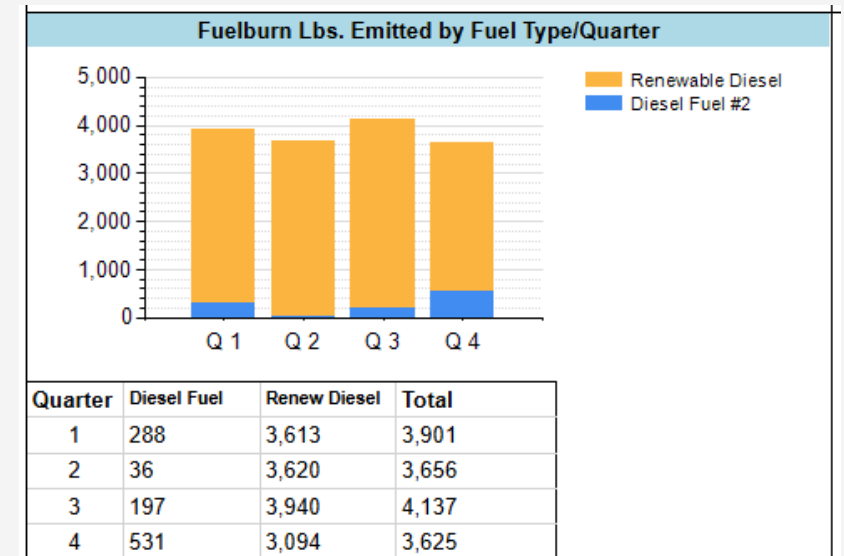

*Run Time (Hours): 23.80

*Quantity Used: 561.1000 Gallons

Product Model: Any

Product No.:

Emissions Details		
Usage Date	Pollutant	Emission in Lbs.
01/31/2024	11104-93-1 Oxides of Nitrogen	9.42087
01/31/2024	9901 Diesel Particulate	0.23005

- CREATIVE SOLUTIONS:

- E The Fuelburn Emissions module was modified in the same ways as the Paintman module to allow for either standard pollutants or chemical specific pollutants on equipment pollutant setup pages, reports (including 12 month rolling), and dashboards. Automatic default of standard pollutants can be overridden by client preference.

EHSdesk Shipbuilding Pilot – Lessons Learned – Examples

- F Emissions from Adhesive application need to be tracked in a similar manner to Painting/Coating usage. Adhesive materials are similar in nature to Paints and Coatings from a material/safety data sheet standpoint.

Add Adhesive Usage - Multiple Records

Complete the fields below to add new Adhesive Usage events.

Usage Details

*Usage Person:

Cottle (NASSCO), Betsy

*Activity:

Adhesive Coating

▼

*Location:

Training Site

▼

CREATIVE SOLUTIONS:

- F *Material Type/Usage Activity drop down content of Paint vs. Adhesive utilized to distinguish the 2 different applications. NEW Add Adhesive Usage page created filtering in only applicable Equipment / materials. Search page/reports can pull both sets of data or one or the other.*

Home Page – More Changes to Pursue?

The screenshot shows the EHSdesk home page for 'Facility East'. The top navigation bar includes links for HOME, DASHBOARDS, REPORTS, and HELP, along with a user profile icon. The main content area is titled 'Welcome John Smith' and displays a grid of 18 EHS modules, each with an icon and a link: Action Tracker, Incident Tracker, Corrective Action Request, Audit & Inspection Manager, Risk Assessment, Virus Tracker, EHS Management of Change, Lock Out/Tag Out, Machine Guard, Confined Space, Ergonomics, PIV, Material Tracker, Equipment Characterization, Waste Tracker, Air Emissions, Water, and Sample Tracker. Below the grid is a 'My EHSdesk' section with links for My Training, My To Do List, and My Reports. At the bottom, there are links for Recent Announcements, Privacy Policy, and a New Version of EHSdesk. The footer includes the text 'Cottle, Betsy 06/27/2018'.

- **CREATIVE SOLUTIONS** – a sampling but possibilities are endless:
 - **Risk Assessment (JHA)** - strong need in the industry – Processes, Hazards and Controls lists to be tweaked. Does the scoring algorithm need to account for Shipbuilding?
 - **Confined Space** – Hazards and Controls lists to be tweaked and the pre-filled Permit with assessment data format standardized for marine needs.
 - **EHS Mgt. of Change**– how many yards have an electronic workflow for conditions and approvals solution? Crafting of the perfect checklist of questions to ask requestor of change needed along with standardized list of pre-during-post change conditions.
 - **Lock Out/Tag Out** – apply variances to model for a shop floor machinery environment to account for Shipbuilding
 - **PIV** – are there mechanisms in place for detailing the list of vehicles as well as PIV type driving authorizations?
 - **Audit/Inspection** – prior Quality use for walk around Foreign Object (FOD) inspections – apply to keeping systems clean initiatives?
 - **Safety/Health modules** – assess and meet variances with Maritime OSHA requirements relative to OSHA requirements

EHSdesk Safety Modules

Safety

- **Lock Out/Tag Out (LOTO)** provides a mechanism to document the process to *systematically control Hazardous Energy* sources for a piece of equipment (Energy Control Procedure: ECP)
- **Machine Guard (MG)** documents equipment-specific machine guard Assessment and Inventory information
- **Confined Space (CS)** provides a way to *determine* if an area within a facility is a confined space as a result of limited access, special inspection, cleaning or Permitting requirements
- **Ergonomics (ERGO)** provides a common location where Shop and Office ergonomic *practices* and information can be assessed, managed, shared, and *incorporated directly into Business Processes and Culture*.
- **Personal Protective Equipment (PPE)** provides a *method to Document* PPE needed when operating the equipment along with a printed PPE posting report (aka “PPE Dude”)
- **Operator Preventive Maintenance (Op PM)** Documents *machine-specific* Preventive Maintenance (PM) inventory/instructions with pictures
- **Powered Industrial Vehicles (PIV)** documents PIV inventory and PIV driving permits for authorized personnel

EHSdesk Management Systems Modules

Mgt.
Systems

- **EHS Management of Change (EMOC)** provides a way to *ensure* that *Facility Modifications*, Chemical changes, Equipment moves or Procurement, and Process Modifications are *reviewed* for EHS and facilities impacts
- **Risk Assessment (RA)** provides a mechanism for identifying, prioritizing, and *Controlling Risks* to worker safety and the environment. RA *identifies* process hazards, steps, risks, and control measures. Optional IH Qualitative assessment is available
- **Action Tracker (ACT)** *Maintains* the various *Action Items* involved with managing EHS or Quality *requirements* for an organization
- **Incident Tracker (ITA)** *Tracks and Maintains* medical (injuries, illnesses), other (near hits, unsafe acts), and environmental (spills, releases) incidents.
- **Corrective Action Request (CAR)** offers a *systematic process* for tracking the tasks necessary to *Perform* corrective action investigations, identify root causes, and *Implement* corrective action plans in a timely manner
- **Audit & Inspection Management (AIM)** establishes a standardized format for all audits/inspections for internal (optionally with checklist), external, and supplier audits. Findings are tracked as CARs

EHSdesk Environment Modules

Environment

- **Waste Tracker (WST)** application provides a characterization methodology to detail the types of waste/scrap metal associated with operational processes. WST provides the capability to track wastes (hazardous, non-hazardous, universal, etc.) from point of generation (POG) to final disposition (shipment for disposal, treatment, reuse, or recycling)
- **Equipment Characterization (EC)** application provides a mechanism to document the processes, waste characterizations, and materials related to a piece of equipment or group of equipment
- **Material Tracker (MAT)** application manages material/chemical usage for regulatory reporting. MAT accepts file imports or manual entries of materials purchased and applies a conversion factor to produce purchase data acceptable for chemical reporting. MAT also acts as the centralized repository for master material data(materials, safety data sheet [SDS] properties, chemical constituents, chemicals, etc.) for the rest of EHSdesk
- **Regulation Manager (REG)** application maintains and tracks regulatory records (e.g., permits and licenses). Expiration and renewal dates automatically create action items in the Action Tracker (ACT) application providing automatic e-mail notifications

EHSdesk Environment Modules...continued

Environment

- **Air Emissions (AIR)** module is the overall umbrella for applications related to Air Emissions to help drive regulatory/permit compliance. AIR applications are integrated throughout with the master Equipment and Materials lists
 - **Painting/Coating** application provides an emissions collection and reporting system for paint/coating/thinner and adhesive usage at booths or other processes. Permit Limits are factored in with exceedance notifications/rules
 - **Fuelburning** application provides an emissions collection and reporting system for natural gas, diesel, and other fuels used at boilers or other fuel burning equipment. Permit Limits are factored in with exceedance notifications/rules
 - **Stacks** application maintains an inventory of air emissions sources (stacks, vents, fugitive, etc.). Stacks can be related to Equipment and Control Systems
- **Water** application maintains an inventory of discharge sources such as drains and discharge points as well as detailed information on the wastewater discharge flow from equipment
- **Sample Management (SAMPLE)** provides a mechanism for identifying sampling locations related to other objects within EHSdesk (e.g., discharge point). Analytical results can be detailed through manual input or data file upload from laboratories

EHSdesk Demonstration

The screenshot displays the EHSdesk web application interface for 'Facility East'. The top navigation bar includes links for HOME, DASHBOARDS, REPORTS, and HELP, along with a user profile icon. A sidebar menu on the left lists categories: TOOLS, SAFETY, MGT. SYSTEMS, ENVIRONMENT, ADMINISTRATION, and TRAINING. The main content area features a 'Welcome John Smith' message and a grid of 18 tool icons, each with a corresponding link. The tools are organized into four rows: Row 1 includes Action Tracker, Incident Tracker, Corrective Action Request, Audit & Inspection Manager, Risk Assessment, and Virus Tracker; Row 2 includes EHS Management of Change, Lock Out/Tag Out, Machine Guard, Confined Space, Ergonomics, and PIV; Row 3 includes Material Tracker, Equipment Characterization, Waste Tracker, Air Emissions, Water, and Sample Tracker; Row 4 includes Regulation Manager, Operator PM, and PPE Assessment. Below the grid, there is a 'My EHSdesk' section with links for My Training, My To Do List, and My Reports. At the bottom, there are links for Recent Announcements, Privacy Policy, and a New Version of EHSdesk notification. The user's name, Cottle, Betsy, and the date 06/27/2018 are displayed in the bottom right corner.
