## Sustainment Panel Meeting, FMMS – San Diego, CA

**\*This year's Sustainment Panel meeting is held in partnership with the Fleet Maintenance & Modernization Symposium. The panel meeting will join the main session during the keynote presentations as they represent a tremendous opportunity to hear from leaders and experts across the broader Sustainment community. Please be aware that admission to the keynote presentations require a paid FMMS registration. NSRP Sustainment Panel attendees are encouraged to register for FMMS, and participate in the symposium roundtable and technical discussions being held throughout the week.**

**Please also note that given the tight timeframe between the Sustainment Panel meeting and the deadline for returned votes, *we will be holding the vote at the end of the panel meeting.***
