

NANOSHIELD™

ECOHULL™

ADVANCED MARINE COATING TECHNOLOGY

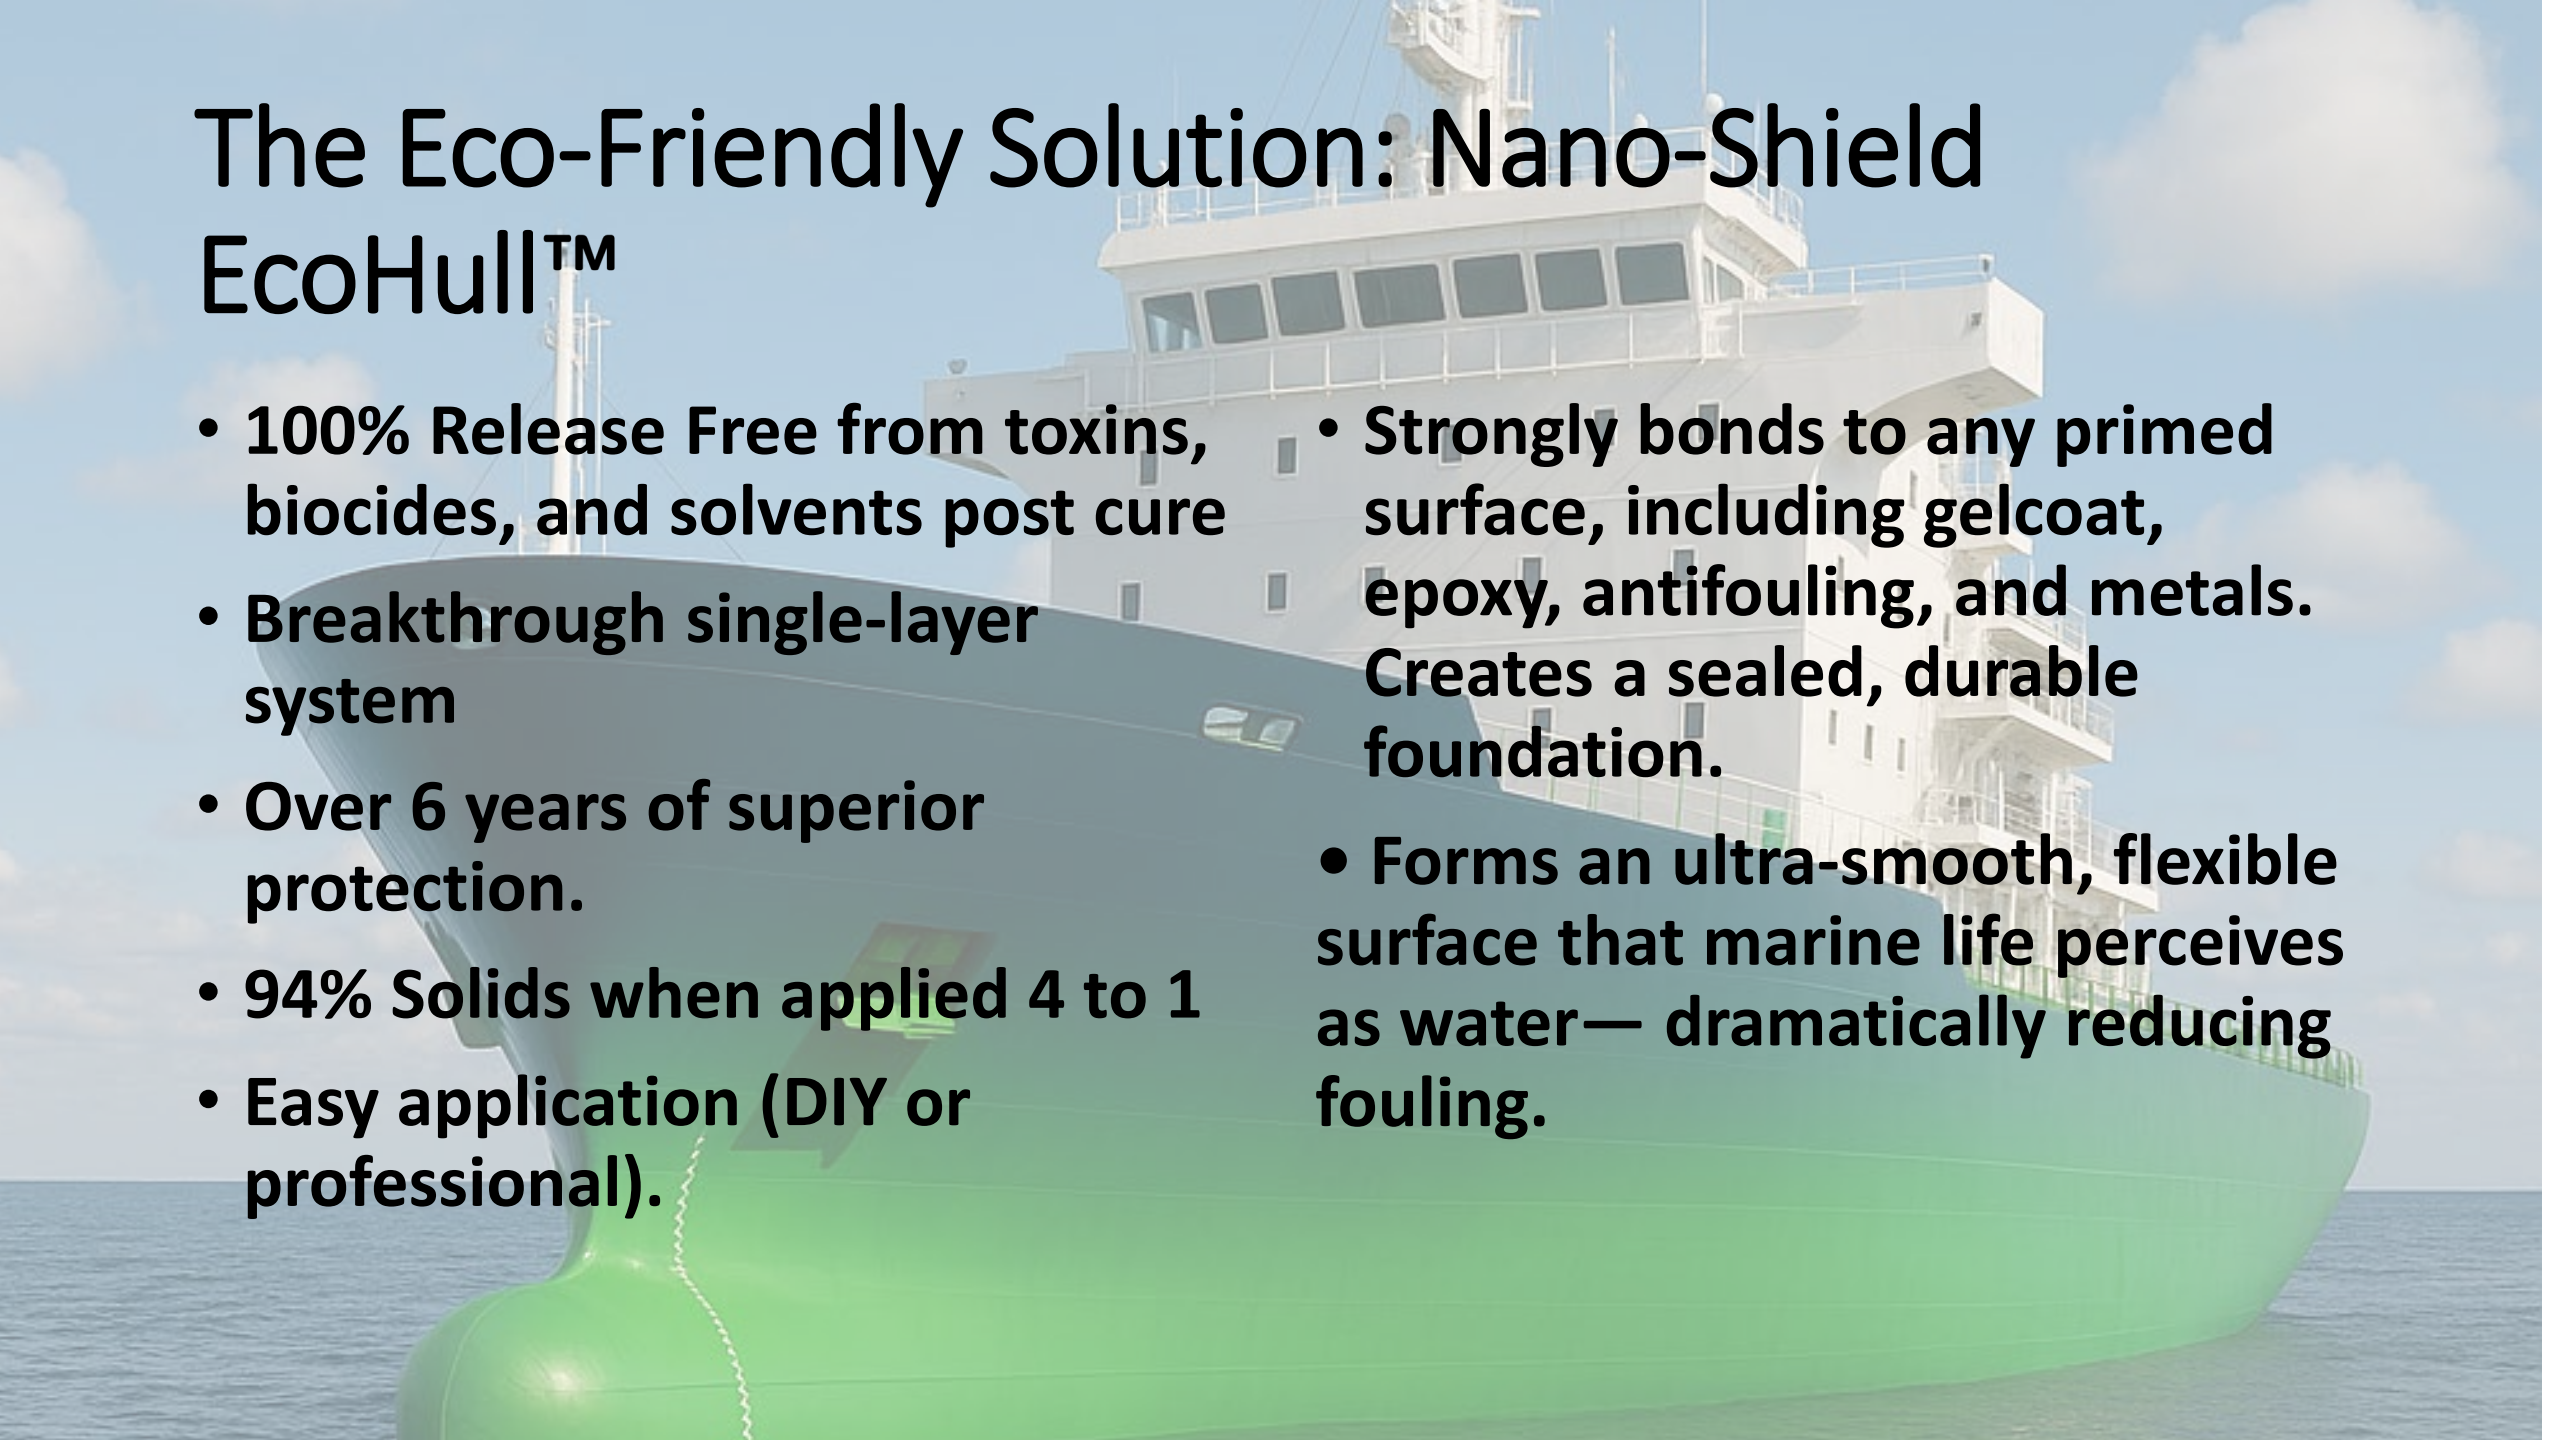

An underwater photograph showing a dark green, murky environment filled with various pieces of marine debris. A clear plastic bottle is visible on the left, and a small, translucent fish is on the right. The scene is cluttered with small particles and larger pieces of trash, illustrating the impact of pollution on marine life.

The Environmental Impact of Traditional Marine Coatings

- Harmful VOCs and biocides in traditional antifouling paints.
- Pollution of marine ecosystems.
- Increasingly stringent environmental regulations

The Eco-Friendly Solution: Nano-Shield EcoHull™

- 100% Release Free from toxins, biocides, and solvents post cure
- Breakthrough single-layer system
- Over 6 years of superior protection.
- 94% Solids when applied 4 to 1
- Easy application (DIY or professional).
- Strongly bonds to any primed surface, including gelcoat, epoxy, antifouling, and metals. Creates a sealed, durable foundation.
- Forms an ultra-smooth, flexible surface that marine life perceives as water— dramatically reducing fouling.

How it Works: Superior Protection & Performance

- Superior adhesion to various surfaces.
- Ultra-smooth, flexible surface preventing marine organism attachment.
- Significant reduction in drag and fuel consumption.

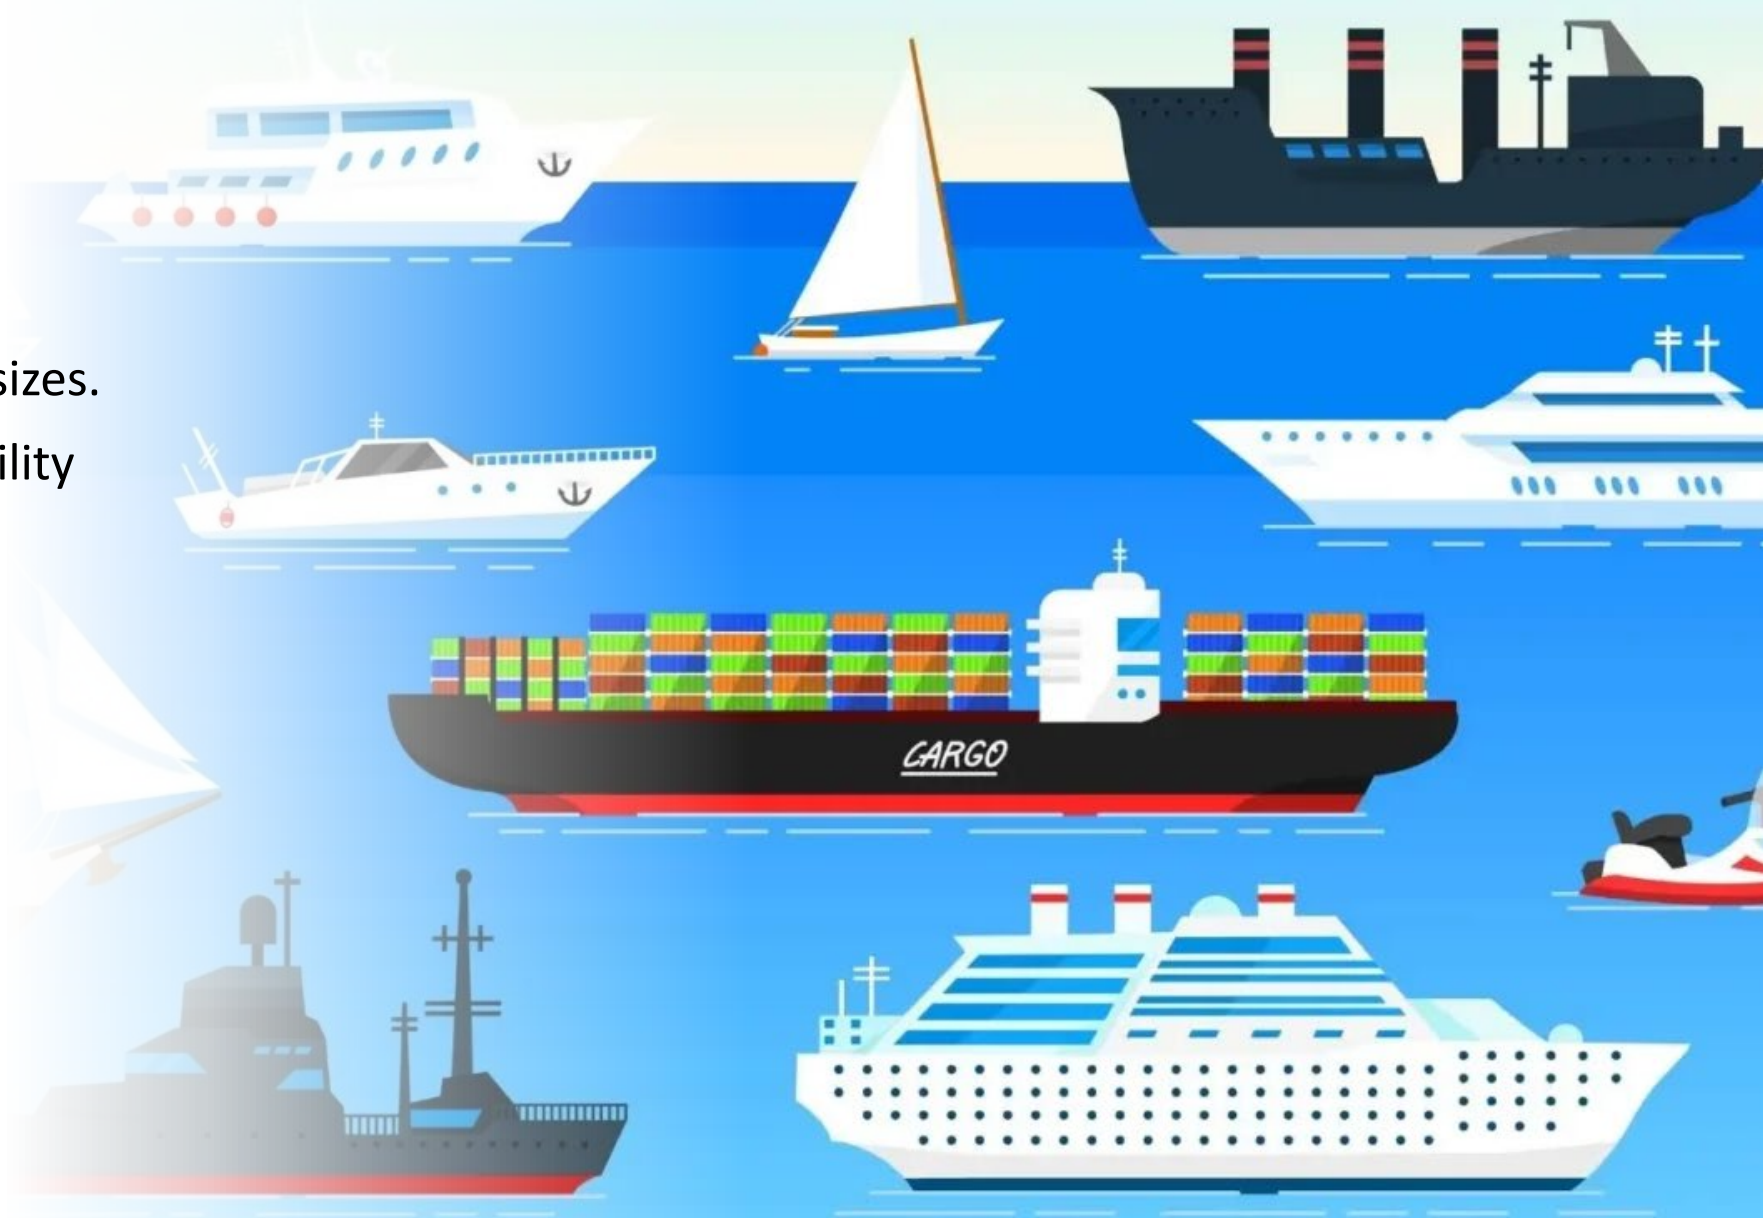

Experience the EcoHull™ Advantage

Advantages

- **Exceptional fuel savings.**
- **Longer-lasting protection.**
- **Reduced maintenance.**
- **Environmental responsibility**
- **Fresh or Salt Water**

A Vast Market Awaits

- Applicability to all vessel sizes.
- Alignment with sustainability goals (LEED, WELL, ESG).
- Growing demand for eco-friendly alternatives.

Why Choose Nano-Shield EcoHull™?

- **Consumers:**
Safer, cleaner, faster vessels.
- **Professionals:**
Regulatory compliance and high performance.
- **Partners:**
Unique competitive advantage & lifecycle savings.

Partner with Nano-Shield

- Commercial rollout and pilot projects.
- Opportunities for early adoption and partnerships.
- Future certifications and scaling plans.
